NEDRA
National Electric Drag Racing Association

John Metric is running for President of NEDRA.

John is a metallurgist from Houston Texas. He has engineered and operated "DC Plasma" furnaces up to 64megawatts. John got interested in Battery Powered vehicles when he saw an electric powered snowmobile in Canada. Interested why it took off so fast off the line compared to ICE ones he found a fellow on line named Mike Willmon in Alaska who was lifting the wheels of his Pinto off the ground on the drag strip and was hooked. John abandoned his dream to build a kit car and turned his Fiero into "DC Plasma" modeled after Mike's "Crazyhorse". You can watch some of John's exploits on Youtube John later created "Assault&Battery". He has set many world benchmarks for the 1/8th , ¼ , ½ mile and 1 mile for door slammer cars. John's latest creation is four motored rail dragster, "Panic in Detroit" and he hopes it will strike fear into Motown car company execs.

John, with his MBA and engineering degree brings a business development flavor to NEDRA-presidency and hopes to keep it growing following on the great work of the folks who have come before.

Recent NEDRA Executive Accomplishments
-Created NEDRA Points Championship Series for weekend warriors all over the world can compete for trophies and contingency awards.
-Built Watt's Allowed table making building and deciphering whether your car meets certain classes easy.
-Voltage Table Update to include higher voltages used by the AC motor folks.
-Widened High School and Educational institution participation into all EV classes not just two as it was before.
-Has appeared on Motorweek Magazine twice, CBS Evening News with Scott Pelley, Car Show Television, and numerous on line magazines pumping up NEDRA and EV racing.
-Created OEM vehicle manufacturer award to salute car companies' contribution to EV Drag racing.
-First properly passed rulebook modification in quite a few years.
-First properly passed Record Rules in quite a few years.
-Wrote Regional Director job description.
-Personally recruited/coerced the following NEDRA members to work for NEDRA without pay….and thus created a great team environment.
